EXPERIENCE

HCLTech – Scholar Trainee — June 2025 - Dec 2025

- Trained in Python programming with libraries such as NumPy, Pandas, and Matplotlib for data analysis and visualization.
- Worked on a capstone project simulating real-world data analysis, where I implemented data preprocessing, exploratory data analysis (EDA), and visualizations to derive insights from large datasets.
- Collaborated with peers in coding exercises and problem-solving sessions, enhancing teamwork and debugging skills.
- Built a strong foundation in Python programming, data handling, and analytical problem-solving to prepare for project assignments in the IT industry.

PROJECTS

BiteXpress (Live: https://bite-xpress.vercel.app/) — July 2024 - Aug 2024

- **Tech Stack**: React.js, Redux, Parcel, Swiggy Apis.
- **Developed BiteXpress**, an online food ordering platform allowing users to discover 20+ local restaurants, add items to their cart, and review a detailed billing summary on a dedicated cart page.
- **Leveraged Swiggy APIs** to dynamically fetch and display restaurant and menu data, ensuring relevance for 500+ food items.
- **Utilized Redux** for robust state management and implemented efficient bundling techniques with Parcel, optimizing application performance and reducing load times.

NetflixGemini (Live: https://netflix-gemini-eight.vercel.app/) — Sept 2024 - Oct 2024

- **Tech Stack**: React.js, Redux, Firebase Auth, Tailwind CSS, TMDB APIs, Gemini 1.5 flash API
- **Developed a Netflix Clone app** using React.js, integrating TMDB APIs to deliver a catalog of 10000+ movies and TV shows.
- **Implemented Google Firebase** for secure and reliable user authentication and managing data using multiple collections.
- **Enhanced user experience** by adding features to save movies to a "Watch Later" list and track liked movies.
- **Utilized Gemini 1.5 flash APIs** for movie and TV show recommendations.
